<p>Full Spectrum 5% CBD Oil, CO2 Extracted in Hemp Oil or in Extra Virgin Olive Oil</p>	<p>Futura 75</p>	<p>10 ml</p>	<p>Canna Med's CBD Oil products are manufactured with GMP certified CO2 Supercritical Extraction Equipment from the well-known American company Apeks Supercritical.</p> <p>This method ensures the full spectrum extract's quality and its absorption by the human organism. All the beneficial properties of Cannabis are preserved, along with all the beneficial ingredients of the full cannabinoid profile. The content of Cannabidiol (CBD) is 5% and the extract is rich in natural terpenes that protect the immune system, as well as flavonoids, phenols, vitamins and chlorophyll. It is a natural product, very low in THC <0.20%.</p> <p>This product has 5% content in full spectrum Cannabidiol (CBD & CBDA). The extract hasn't been decarboxylated, and along with its terpenes and the rest of the cannabinoids, the entourage effect applies. Chlorophyll, which is also included in the extract, makes its taste a bit bitterer, but it also benefits the consumer thanks to its anti-inflammatory properties.</p> <p>Each bottle contains 10 ml oil with 5% (500 mg) content in Cannabidiol. Each ml consists of 20 drops, containing approximately 2,5 mg of CBD each. The bottle is of PET plastic, with tamperproof and childproof cap, while the dropper is attached to the bottle, making its use easy and practical everywhere and anytime the consumer prefers.</p> <p>Try it and enjoy it in two flavors, either in Hemp Oil or in Extra Virgin Olive Oil.</p> <p>Store in a shady & cool place. Best consumed within 30 days of opening. Shake well before the sublingual use. Keep the oil in your mouth for a minute or more before swallowing. The oil is absorbed by the glands of the mouth and through the blood, it passes into the body's circulation, where it acts beneficially. Ideal for Vegan diet.</p>	<p>5% CBD in Hemp Seed Oil</p>  <p>5% CBD in Extra Virgin Olive Oil</p>

<p>Premium Seedless Hempflower</p>	<p>Kompolti</p>	<p>2 grams</p>	<p>Canna Med's Premium Full Seedless Hemp Flower of Kompolti strain, packaged in PET zip-lock bag for its best maintenance. Kompolti is a dioecious industrial Cannabis strain that originates from Hungary. The success of producing a seedless hemp flower is achieved by selecting only the female plants and cultivating them indoor. Kompolti is distinguished for its earthy taste and its rich aroma, as it contains more cannabinoids than the common outdoor strains, similar to those of the Kush strain, but with content in THC below the legal limits of 0.20%.</p>	
<p>Cannabis Beverage in Tea-Bags, Rich in CBD</p>	<p>Futura 75</p>	<p>10 x 1 gram</p>	<p>This Canna Med's Cannabis Beverage is packaged in individual doses (tea-bags) of 1 gram. The strain used is Futura 75, a French strain which was produced for its seeds and to be used in the food industry because of its genetic features. The consumer has the chance to enjoy a beverage rich in terpenes, omega 3 and omega 6 fatty acids, substances which activate the endocannabinoid system and give a feeling of well-being with anxiolytic and analgesic properties. A cup of boiling water and a Cannabis tea-bag are enough, nevertheless some olive / coconut oil is advised, or some butter, as they make the extraction more efficient. Each box is contained in an air-tight transparent shrink wrap, ensuring the product's maintenance. Each box includes 10 Cannabis paper filter tea-bags with a string and a tag. This product is also suitable for professional use, due to its ease and speed of its preparation.</p>	
<p>Cannabis Beverage in Full Hemp Flowers, Rich in CBD</p>	<p>Futura 75</p>	<p>12.5 grams</p>	<p>This Canna Med's product consists of full Cannabis Futura 75 Hemp Flowers, with THC < 0.20%, which were selected and collected by hand, dried naturally and packed in a 12.5 grams zip-lock bag for their best preservation. The flower seeds are rich in fatty acids (ω3 / ω6) and proteins, as well as oils, which help the process of extraction and the absorption of Cannabidiol. Once the extraction is done, the flowers are to be removed from the prepared beverage. It can be enjoyed hot or cold.</p>

<p>Cannabis Beverage in Ground Hemp Flowers, Rich in CBD</p>	<p>Futura 75</p>	<p>12.5 grams</p>	<p>Canna Med's Ground Hemp Flowers of the Futura 75 strain were collected selectively by hand. After their natural drying, they were ground and packaged in 12.5 grams in a zip-lock bag for their better preservation. The consumer can benefit from the full range of cannabinoids, including their soothing and antioxidant properties, with THC < 0.20%. The end result is a product, full of all the benefits of Cannabis, in the form of oregano, pure of seeds and stalk. For this reason, it can be used not only as a beverage, but even as an ingredient in recipes or as a spice.</p>	
<p>Cannabis Beverage in Ground Hemp Flowers, Rich in CBG</p>	<p>Santhica 70</p>	<p>12.5 grams</p>	<p>Another French strain, Santhica 70, was used to create this Canna Med beverage. Although this strain shares the same origin with Futura 75, its genetics do not allow it to reach high levels in Cannabidiol. However, instead of the latter, it has another cannabinoid, Cannabigerol (CBG) and it is low in THC <0.20%. According to researches, some of the benefits of Cannabigerol are its anti-inflammatory and analgesic effects, as well as its ability to soothe the feeling of nausea and to delay the proliferation of cancer cells. It also significantly reduces the intraocular eye pressure caused by glaucoma. Finally, Cannabigerol seems to have a higher absorbability, even in people who are intolerant or in those who are not covered by Cannabidiol. The hemp flowers were collected, ground and then packaged in a 12.5 grams zip-lock bag for better preservation and easier use. The goal is the consumer's satisfaction to be equal to the benefits of this strain. Most seeds have been removed, however, those that have remained are crushed, ready to release their proteins and oils during boiling.</p>

**XXL Cannabis
Beverage in
Full Hemp
Flowers, Rich
in CBD**

Futura 75

100 grams

This Canna Med's product consists of Full Futura 75 Hemp Flowers, with THC within the legal limit, < 0,20%. These hemp flowers were collected by hand and dried naturally. They were then packaged in a 12.5 grams PET zip-lock stand-up pouch, something that ensures the product's best and long-term preservation. The preparation of this beverage consists of the boiling of the hemp flowers, without, or with the seeds, preferably crushed, as they are rich in terpenes and oils which help the absorption of Cannabidiol by the human organism and the activation of the endocannabinoid system, which acts beneficially, as a second immune system. Each package contains 100 grams of Futura 75 Full Hemp Flowers, something that makes it the perfect package size for the lovers of this beverage. Additionally, it is ideal as a cooking ingredient and as a ready-to-consume product, resold by the competent industries, as its formability ends where the creativity of the person who prepares it ends, too. The consumer may enjoy it either with or without its seeds, either hot or cold, either plain or with added ingredients of their choice.
